PR Initial Patient Population
Algorithm

Variable Key:
Patient Age
Neonate Patient Age at Admission
Initial Patient Population Reject Case Flag
Length of Stay

Start PR Initial Patient Population logic sub-routine

ICD Start

Process all cases that have successfully reached the point in the Data Processing Flow which calls this Initial Patient Population Algorithm. Do not process cases that have been rejected before this point in the Data Processing Flow.

Note: To calculate age must use the month and day portion of admission date and birthdate to yield the most accurate age.

Patient Age (in years) = *Admission Date minus Birthdate*

Patient Age — = 0 years → Patient **not in** the PR-Mother Initial Patient Population → Patient **is not** eligible to be sampled for PR-Mother measures

> 0 years

Patient Age — (> 0 years and < 8 years) OR >= 65 years →

>= 8 years and < 65 years

Neonate Patient Age at Admission (in days)= *Admission Date minus Birth Date*

Note: To calculate age must use the month and day portion of admission date and birthdate to yield the most accurate age.

Length of Stay (in days) = *Discharge Date minus Admission Date*

Neonate Patient Age at Admission — age > or = 28 days →

age > or = 0 days and < 28 days

Length of Stay — > 120 days →

<= 120 days

Length of Stay (in days) = *Discharge Date minus Admission Date*

ICD-9-CM Principal or Other Diagnosis Code — None on Table 4.01, 4.02, 4.03, or 4.04 → Patient **not in** the PR-Mother Initial Patient Population

Length of Stay — > 120 days →

<= 120 days

At least one on Table 4.01, 4.02, 4.03, or 4.04

Patient **is not** eligible to be sampled for PR-Mother measures

Patient **is in** the PR-Neonates Initial Patient Population

Patient **not in** the PR-Neonate Initial Patient Population

Set **Initial Patient Population Reject Case Flag** = "Yes"

Patient **is eligible** to be sampled* for the PR-Neonate measure

Patient **is not** eligible to be sampled for PR-Neonate measure

Patient **is in** the PR-Mother Initial Patient Population

Patient **is** eligible to be sampled* for the PR-Mother measures

Set **Initial Patient Population Reject Case Flag** = "No"

Patient **not in** the PR-Neonate Initial Patient Population

Patient **is not** eligible to be sampled for PR-Neonate measure

Set **Initial Patient Population Reject Case Flag** = "No"

Set **Initial Patient Population Reject Case Flag** = "Yes"
