v2010B

PC-Newborn Initial Patient Population Algorithm

Issue: Currently in the Initial Patient population algorithm, the offpage connector 'J' on page-3 of the algorithm flows into the "Set **Initial Patient Population Reject Case Flag = "Yes"**" box instead of the termination box "Return to Data Processing Flow (Data Transmission section)".

Resolution: Remove the off page connector 'J' on page-3 of the algorithm that flows into the "Set **Initial Patient Population Reject Case Flag = "Yes"**" box. Add off page connector 'J' to termination box "**Return to Data Processing Flow (Data Transmission section)**".
