| PC      | Updates in verbiage in PC Initial patient population section for clarification. Removed Length of Stay \(\leq 120\) days for PC-06 Initial patient population. | Initial Patient Population  
**Change from:** Newborns with BSI and Unexpected Complications The Newborns with BSI population and PC-Newborns with Unexpected Complications are not eligible for sampling and will use the entire Newborns with BSI Initial Patient sampling group for reporting.  
**Change To:** Newborns with BSI and Unexpected Complications The Newborns with BSI population and PC-Newborns with Unexpected Complications population are not eligible for sampling. Report the entire Newborns with BSI Initial Patient Population group, and the entire PC-Newborns with Unexpected Complications Initial Patient Population group for reporting.  
**Remove:** Length of Stay (Discharge Date - Admission Date) \(\leq 120\) days from Newborns with Unexpected Complications |
| PC-06   | Added a sentence to Rationale to clarify how length of stay modifiers are used in the measure. Revised the numerator population to clarify that transfers to higher level of care are to be included and to correct a typo. Revised references throughout the measure related to birth weight to be consistent with inclusion of birth weight of 2500 gm or over. Added clarification in denominator exclusions to check birth weight when missing term status. | Rationale:  
Add: This measure also uses length of stay (LOS) modifiers to guard against overcoding and undercoding of diagnoses.  
**Numerator Included Populations**  
**Change** second bullet  
From: Transfer to a another acute care facility  
To: Transfer to another acute care facility for higher level of care  
**Denominator Statement:**  
From: Liveborn single term newborns over 2500 gm in birth weight.  
To: Liveborn single term newborns 2500 gm or over in birth weight.  
**Denominator Excluded Populations**  
**Change** second bullet  
From: ICD-10-CM Principal Diagnosis Code or ICD-10-CM Other Diagnosis Codes for birth weight \(\leq 2500\)g as defined in Appendix A, Table 11.12, 11.13, 11.14, 11.15 or 11.16 OR Birth Weight \(=\) 2500g  
To: ICD-10-CM Principal Diagnosis Code or ICD-10-CM Other Diagnosis Codes for birth weight \(< 2500\)g as defined in Appendix A, Table 11.12, 11.13, 11.14, 11.15, 11.16, 11.20 OR Birth Weight \(< 2500\)g |
flow for types of birth. Added two Discharge Disposition codes to Severe Numerator and revised the branches.

Add fourth bullet
Patients whose term status or gestational age is missing and birthweight < 3000 gm

Measure Algorithm:
Delete UTD for Term Newborn
Delete check of Table 11.20.3
Change Missing Birth Weight to separate branch
Add Discharge Disposition 3 and 5 to Severe Numerator; Change branch From Not 4, 6 or Missing To 1, 2, 7, 8

Data Elements

<table>
<thead>
<tr>
<th>Section</th>
<th>Rationale</th>
<th>Description</th>
</tr>
</thead>
</table>
| Discharge Disposition   | To clarify that for PC measures only it is acceptable to utilize electronic data sources to capture this data element. Add guidance for how to abstract a record when a newborn is transferred to another healthcare facility for purposes other than to receive a higher level of care. | Notes for Abstraction:
Add:  
- For PC Only: Hospitals are encouraged to utilize a data source that reduces unnecessary medical record review e.g., using vital records, delivery logs or clinical information systems as a data source. Mapping from electronic administrative sources to the allowable values is acceptable.  
- For PC-06 Only: If a newborn is transferred to another acute care facility for purposes other than medical treatment or the need for a higher level of care, abstract allowable value 8. Examples include: Newborn is transferred to another facility covered by their healthcare plan or for disaster evacuation.

Suggested Data Sources:
Add:
PC ONLY Excluded Data Source
- Any documentation prior to the last two days of hospitalization |
| Large Vessel Occlusion (LVO) | Correct Typo.                                                            | Collected For Remove CSTK                                                  |
| MER Eligibility           | Correct Typo.                                                            | Collected For Remove CSTK                                                  |

Supplemental Materials

<table>
<thead>
<tr>
<th>Section</th>
<th>Rationale</th>
<th>Description</th>
</tr>
</thead>
</table>
| Appendix A - ICD-10 Code Tables | Updates to Appendix A PC-06 tables made to align with the original measure and corrected the title of Table 11.45. | Table 11.31 Fetal conditions
Remove: P0270 Newborn affected by fetal inflammatory response syndrome P0278 Newborn affected by other conditions from chorioamnionitis
Table 11.33 Neonatal Jaundice
Remove: P582 Neonatal jaundice due to infection |
Table 11.36 Severe Birth Trauma

Remove:
P113 Birth injury to facial nerve
P153 Birth injury to eye

Table Number 11.39: Neonatal Severe Respiratory Complications

Remove
P2401 Meconium aspiration with respiratory symptoms

Table 11.45
Change title name
From: Table 11.45: Neonatal Severe Infection
To: Table 11.45: Neonatal Severe Septicemia

Table 11.49 Moderate Birth Trauma with LOS

Remove:
P035 Newborn affected by precipitate delivery
P036 Newborn affected by abnormal uterine contractions
P03810 Newborn affected by abnormality in fetal (intrauterine) heart rate or rhythm before the onset of labor
P03811 Newborn affected by abnormality in fetal (intrauterine) heart rate or rhythm during labor
P03819 Newborn affected by abnormality in fetal (intrauterine) heart rate or rhythm, unspecified as to time of onset
P0389 Newborn affected by other specified complications of labor and delivery
P039 Newborn affected by complication of labor and delivery, unspecified

Add:
P024 Newborn affected by prolapsed cord
P134 Fracture of clavicle due to birth injury
P154 Birth injury to face
P501 Newborn affected by intrauterine (fetal) blood loss from ruptured cord
P518 Other umbilical hemorrhages of newborn
P519 Umbilical hemorrhage of newborn, unspecified
P613 Congenital anemia from fetal blood loss

Table 11.50 Moderate Respiratory Complications with LOS

Remove:
P2410 Neonatal aspiration of (clear) amniotic fluid and mucus without respiratory symptoms
P2420 Neonatal aspiration of blood without respiratory symptoms

Add:
P2481 Other neonatal aspiration with respiratory symptoms
P2401 Meconium aspiration with respiratory symptoms

Sampling
Addition of STK outpatient measure.
Added STK outpatient data element where necessary.

Transmission of Data
ASR measure information added into data transmission section.
Outpatient elements removed
Data Transmission Section:
Add Outpatient Clinical and Population data verbiage.
Add ASR data transmission information where necessary.
from the inpatient XML file layout.
Added new outpatient XML file layout.

XML layouts:
Add Outpatient Clinical XML layout.
Add Outpatient Population XML layout.
Change Inpatient XML layout removed outpatient elements.
